(57) **ABSTRACT**

An irrigation wheel traction lug, comprising a lug having a bent-paddle, a base and a one or more chains. Said bent-paddle comprises a first side, a second side and a front portion. Said bent paddle comprises a substantially “V” shape when viewed from above. Said first side and said second side flare backward away from a front portion of said base portion toward a rear edge. and Said lug selectively attaching to an irrigation wheel, having a tread pattern and a rim, by placing said base on said tread pattern, wrapping said one or more chains around said irrigation wheel between said rim and said tread pattern, and securing said lug to said irrigation wheel with said base and said one or more chains.
